Summary of Submission	Ensure any residential development should be within UGBs as determined to prevent any further erosion of rural land for say affordable housing, retirement villages or so called needy developments. These should be contained within areas already committed for urbanisation within UGBs. McDonnell Road must be retained as a boundary with the Rural zoning including the Hills golf course on one side and housing in different zonings on the other side. It is a low density traffic road where walking, cycling, families live. No urbanisation beyond the UGB for Arrowtown.

Summary of Submission	Property Height and Density Would like all areas to have significantly higher property heights, especially towards the centre of Queenstown. Would like to see a far greater density with houses of 4-5 stories as the norm with hotel complexes even higher. Energy Efficiency Would like the building code to encompass PassivHaus standards as the building standards in NZ and Queenstown are generally very poor Transport Would like to see a ban on all polluting vehicles from Queenstown (see Zermatt and Vengen in Switzerland as examples). Airport States that if Queenstown wishes to grow flights, then moving the airport well away from the town should be considered.

Summary of Submission	If the District Plan sets the science and strategy for our district's future then I would recommend that there is an objective missing from Goal 1, that recognises a key element of the wellbeing of the QLDC community; Enable a community lead plan to develop employment pathways to contribute to the Districts Economic activity. The region must be active in training and supporting young people in the employment opportunities that exist so there is less reliance on transient labour.

Summary of Submission	States the overall strategic direction is good. It may help to clarify that clean air and pristine water is for both urban and rural areas, not simply "out there" in the environment. Notes the need to be able to define qualitative terms, what is pristine, what characteristics are you measuring, how will you know? Bullet 4 Good to see encouragement of those transport options. Could also include wise resource use eg water use and energy.

Summary of Submission	Objective 3.2.4.2 Should also apply to significant waterways and their sources, eg Bullock Creek being a key example. Not convinced we should have policy 3.2.4.2.2 as it is a way to avoid		

3.2.4.2.1. If you do include it say “environment compensation will be required” in other words strengthen it.

Point Number	117.40	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 92-3.2.4Goal 4 > 101-3.2.4.5Objective 5
Position:	Support		
Summary of Submission	Objective 3.2.4.5 is good, if you add urban streams, but policy 3.2.4.5.1 isn't strong enough. Key areas such as the source of Bullock Creek, should be identified up-front so that there protection is secured prior to, during and after development. The current issue with Bullock Creek being inter alia the access of contaminants such as poly aromatic hydrocarbons and heavy metals to the springs feeding the Creek from road run-off.

Point Number	117.42	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 92-3.2.4Goal 4 > 107-3.2.4.8Objective 8
Position:	Support		
Summary of Submission	3.2.4.8 The policy relates to mitigation. Should also have a policy relating to adaptation which for this District is hazard management related to climate change that recognizes more extreme events, potential flooding an rock-falls. Needs to be applied to key infrastructure and the location of developments.		

Point Number	117.43	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 109-3.2.5Goal 5

Summary of Submission Objective 3.2.6.4 and policy 3.2.6.4.2 There should be obvious and easy connectivity between the open spaces in urban areas, considering both pedestrians and cyclists (not always together) to ensure that there really is a network between as well as within developments, not just a series of separate open spaces. They can also be ecological corridors for bird and insect life.

Summary of Submission Generally supports the goals, objectives and policies in 3.2.1. In particular strongly supports Objectives 3.2.1.3 (diversification of economic base);3.2.1.3.2 (recognise opportunities and risks of climate change). However the submitter strongly opposes the part of Policy 3.2.1.1.3 which seeks to 'promote growth in the visitor industry'. Delete the words 'Promote growth in the visitor industry' in Policy 3.2.1.1.3.

Strongly supports the following - Policy 3.2.2.1.1 'Apply Urban Growth Boundaries' and Objective 3.2.5.4 'finite capacity for residential activity in rural areas..'; Objective 3.2.5.5 'agriculture is fundamental to the character of our landscapes' and consequently Policy 3.2.5.5.2 'retention of character of rural areas are often dependent on...viability...of farming.' Retain Urban Growth Boundaries (Policy 3.2.2.1.1) and Objectives 3.2.5.4; Objective3.2.5.5 and Policy 3.2.5.5.2

Summary of Submission	Supports Objective 3.2.4.7 and Policy 3.2.4.7.1. Seeks that the objective and policy above is deleted from the Strategic Direction chapter (the whole of which the Society opposes) and added to Part 4.4.3 Open Space and Recreation in the Operative District Plan. The Society seeks that 3.2.4.7 is either included as a new objective and policy in 4.4.3 in the form above or incorporated into a rewritten Policy 4.4.3. Objective 4 Esplanade Access in the Operative District Plan. The Society seeks that a comprehensive list of unformed legal roads are mapped and clearly labelled on the District Plan maps. This would be consistent with the proposed marking of these unformed legal roads on cadastral maps by the government's Walking Access Panel in order to facilitate public access along them.

Summary of Submission

The Landscape Lines determined in the Proposed District Plan process are excluded from the Plan altogether because they are not credible.

Failing this the Society seeks that the Landscape Lines are included on District Plan maps as dotted lines and that the Landscape Lines are described as guidelines that are purely indicative.

If this course of action is taken the Society seeks that the text on maps in the Operative District Plan are amended and included in the Proposed District Plan as follows:

"Boundary between two different landscape categories...these dotted lines have been determined under a broad-brush analysis as part of the District Plan process but have not yet been through the Environment Court process to determine their exact location and are not definitive. The dotted lines are purely indicative until their exact location has been determined through the Environment Court process."

Summary of Submission

The Society supports goal 3.2.2 relating to Urban Growth and seeks that it is moved to Part 4 of the Operative District Plan as described above and in a separate submission.

The Society supports the reference to Climate Change 3.2.1.3.2 and seeks that this policy, or similar, is included in Part 4 District Wide Issues of the Operative District Plan.

The Society supports the proposed Part 3.2.4.7 relating to public access and seeks that this is moved to Part 4.4.3 of the Operative District Plan as described above and in a separate submission.

The Society seeks that the Strategic Direction chapter is deleted from the Plan. Parts of the Strategic Direction chapter that have some purpose (as described above) should be moved to the relevant parts of the Plan within the Operative District Plan structure.

The Society seeks the retention of the existing structure in the Operative District Plan and sees very little merit in the Strategic Direction chapter.

Summary of Submission	Requests the ONL lines be reviewed. Submitter objects to the ONL lines which have been drawn on the new district plan maps. Submitter notes that in the Morven Ferry Neighbourhood (shown on proposed planning map 30) it has been drawn in where there was no line before, running through paddocks that have been ploughed and heavily modified. On the submitters neighbouring property Doonholm the ONL line has been shown on the developed paddocks well out from the base of Morven Hill, and considers that this line should be moved back to the paper road at the base of Morven Hill. Requests that the ONL line should actually run up and over the top of Morven Hill leaving the back side away from Lake Hayes open for recreational development such as down hill mountain biking.

Summary of Submission	Hawea needs strong protections for the rural landscape to prevent sprawling and sporadic development which would degrade the nature of Hawea. Fertile agricultural land is a valuable resource, therefore subdivision of productive farmland for housing, such as lifestyle and rural residential should not be a discretionary activity but should be a publically notified activity.		

Point Number	289.3	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 74-3.2.2Goal 2 > 75-3.2.2.1Objective 1 > 76-3.2.2.1.1

Summary of Submission	Solar energy is under-utilised across the entire Queenstown Lakes District, promotion is inadequate and consent costs are unfriendly. It is recommended that Council actively promote solar energy.
------------------------------	---

Water efficiency opportunities could be encouraged by requiring all new buildings to collect rainwater. This would reduce storm water runoff and lessen the need for reticulation.

Summary of Submission	The burning of resinous woods such as old pine may have to be phased out. Household heating systems fuelled by the burning of wood and fossil fuels may have to be more stringent emission controls imposed on them by Council. Recommendation [a]: The Queenstown Lakes District Council should ascertain as to whether or not the fencing that extends out over the strips and into the lakes Wanaka and Lake Hawea requires a resource consent and as to whether not the structures present a hazard to boats and		

other floating devices that people now use. [Even at 5 knots significant damage may occur.]

Recommendation [b]: The Queenstown Lakes District Council initiate a study in conjunction with The Department of Conservation, The Otago Regional Council and Kai Tahu Ki Otago to cover such topics as to the extent of encroachment by adjoining landowners on the Marginal Strips and what loss and damage to native vegetation has been incurred. The study to include the means of protection for the banks and shoreline and the means by which the native vegetation may be protected from damage and allow for regeneration.

Summary of Submission	A recording system of all septic tank systems should be instituted if it is not already held and a requirement that a suitably qualified individual oversee any repair work and submit a brief report to council. In addition septic tank cleaner operators be required to furnish a return that details as to where and when their services were availed of, and, in their opinion, as to whether or not the tank that has been emptied waste is operating as designed. Septic tanks after all, are only holding tanks. Action late is better than none at all.

Summary of Submission	Recommendation: Queenstown Lakes District Council initiate a feasibility study for the reestablishment of the horse track access on the western side of Lake Wanaka. The study to include establishing as to whether or not a legal access already exists, estimated construction costings, and estimated benefits [or cost if any] to the local communities. The study to be in conjunction with The Department of Conservation, The Otago Regional Council, and Kai Tahu Ki Otago, all of which have goals that are similar. A concept Plan for a development is held by the Department of Conservation Wanaka in this area - The Neck. The project was conceived in conjunction with Ngai Tahu and is designed to construct a car layby off SH6, two look out points overlooking the wetland area, and walking tracks around the area. Refer also to my paper "Manuwahaia" Goal 7, submitted separately. Recommendation: that the Queenstown Lakes District Council make an approach to both Ngai Tahu and the Department of Conservation, and perhaps the Otago Regional Council for a jointly funded development of this site in terms of the concept plan held.

Summary of Submission

Recommendations:

--All names of sites of importance to Maori as identified in the area shown on the Taiaroa Map of 1879/80 in this submission, should be incorporated into the Archaeological Alert Layer 26.3.1.

--Queenstown Lakes District Council and Kai Tahu Ki Otago to get together to educate the contractors and others as outlined, their responsibilities to Council and the law.

--Designated Council officers, as part of their duties, be made responsible for and record that they have done so, brief details of a random inspection and discussion with site foremen or any other person deemed to be in charge of an operation that entails the disturbance of more than 200m3 of topsoil.

--Any find/s to be reported immediately to the relevant authority.

Summary of Submission	General Support with some amendments requested The submitter generally supports the Strategic Direction chapter of the Plan, with the following additions or exceptions, and comments: Wanaka 2020 consultation discussions gave firm recommendation that the Outer Growth Boundary (OGB) for Wanaka include the three rivers (Clutha, Cardrona and Waterfall Creek [with the fourth Waterway being Lake Wanaka]) as the limiting landscape features within which to contain growth (see Wanaka 2020 plan map in the original submission showing [originally red, but green in the attachment] overwhelming public acceptance and approval of the OGB). The proposed Urban Growth Boundary may be appropriate for a current ten year plan, but the originally recommended OGB needs to be retained; come time for the next review of the Plan, the UGB could, if needed, be expanded. Thus, we seek an additional clause in this section, making it clear that the proposed UGB is not a permanent fixture.

Summary of Submission	General support however requests changes ORC generally supports the strategic directions identified in the Proposed District Plan. However, ORC requests that the desired effects of subdivision, use and development are more clearly specified in the objectives and policies of this section.		
Point Number	798.23	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 74-3.2.2Goal 2 > 75-3.2.2.1Objective 1

Position:	Oppose		
Summary of Submission	ORC supports the concept of compact urban form, but suggests that the District Plan provide for some degree of flexibility where strategic infrastructure supports areas of expansion and relates well to QLDC's unique environment e.g. Objective 4.2.3 and Policy 4.2.3.1. For example, some expansion is appropriate if it occurs around nodes that are connected to a main corridor serviced by public transport. Therefore, ORC requests Objective 3.2.2.1 is amended accordingly.		
Point Number	798.24	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 92-3.2.4Goal 4 > 107-3.2.4.8Objective 8 > 108-3.2.4.8.1
Position:	Oppose		
Summary of Submission	Responding positively to climate change does not require concentrating all future development within existing urban areas (Policy 3.2.4.8.1). Public transport can efficiently support nodes of development connected (e.g. within walking and cycling distance) to a main corridor.		
Point Number	798.25	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 74-3.2.2Goal 2 > 75-3.2.2.1Objective 1
Position:	Oppose		
Summary of Submission	ORC requests that recognition is provided for access and connection to, and between, the tourism/recreational activities which are a large part of the Queenstown-Lakes district experience and employment market, but that lie outside urban growth boundaries and urban based visitor attractions (Policy 3.2.2.1).		
Point Number	798.30	Provision:	57-3Strategic Direction > 59-3.2Goals, Objectives and Policies > 122-3.2.6Goal 6 > 126-3.2.6.2Objective 2 > 128-3.2.6.2.2
Position:	Oppose		
Summary of Submission	ORC requests that provisions for roading, access and parking should recognise the needs of active transport modes, public transport services and infrastructure. Provisions are requested for Residential developments, particularly those large in scale, to provide for public transport services and infrastructure in the future. Main road corridors in these areas should be retained to accommodate public transport services and infrastructure, both now and in the future.

Summary of Submission

Amend.

Amend Objective 3.2.5.2 and Policy 3.2.5.2.1 to reduce inconsistency in terms, and to better reflect the terminology used in the Act.

Provide greater clarity as to the relationship between rural landscape classification and outstanding natural landscapes.

Amend objectives and policies to recognise that it is not only those areas that are located within the UGBs that have the potential to absorb change. Remove inconsistent use of terms. Incorporate Objective 3.2.5.3 as a policy under Objective 3.2.5.2.

Summary of Submission	Recreation - 3.2 Goals, Objectives and Policies - 3.2.4 Goal - 3.2.4.7 Public Access
------------------------------	--

Issue:

(a) Chapter 3 does not contain any high level Goal, Objective or Policy relating to recreation. This is inappropriate in a district where recreation is so important to residents and visitors. Objective 3.2.4.7 goes part of the way by referring to facilitating public access to the natural environment, but that Objective (and the related Policy 3.4.2.7.1) is arguably inconsistent with Goal 3.2.4 which is "The protection of our natural environment and ecosystems" because facilitating public access probably does the opposite.

Relief Requested:

(b) Amend Chapter 3 to appropriately provide a high level direction in relation to recreation. That could be achieved by:

(i) Amending Goal 3.2.4 to read "The protection and enjoyment of our natural environment and ecosystems".

(ii) Amending Objective 3.4.2.7 to read: "Facilitate public access to the natural environment and to recreation opportunities".

(iii) Amend Policy 3.2.4.7.1 to read: "Opportunities to provide public access to the natural environment and to recreation are sought at the time of plan changes, subdivision or development".

Summary of Submission	4.2.1 Add that infrastructure development needs to be sized for all foreseeable growth that it will need to service or be able to be adapted as demand requires		

4.2.2 Communicating urban growth boundaries and zoning and what that means for people buying sections/land needs to be clearer.

4.2.2.5 While urban growth boundaries will need to be reviewed the zones within them shouldn't be.

4.2.3 Somewhere within this clause it could be stated that development should allow for people living in in low, medium and high density residential zones should be within a given distance to key amenities.

4.2.6 The Wanaka Map should be updated to reflect what is there.

4.2.6.2 Ensure that the land is zoned so that it is clear where greenfield and in-fill development will occur.

Summary of Submission The Urban Growth Boundaries are included on maps in the District Plan and by means of changing the existing policy 4.2.5.6 in the Operative District Plan to include Proposed District Plan policy 3.2.5.3.1 and Proposed District Plan policy 6.3.1.7 to read:

4.2.5.6 Urban Development

(a) Direct urban development to be within Urban Growth Boundaries (UGB) where these apply, or within the existing rural townships.

(b) When locating urban growth boundaries or extending urban settlements through plan changes, avoid impinging on Outstanding Natural Landscapes or Outstanding Natural Features and minimise disruption to the values derived from open rural landscapes

(ca) To avoid new urban development in the outstanding natural landscapes. ~~of Wakatipu~~ ~~basin of the district.~~

(b) To discourage urban subdivision and development in the other outstanding natural landscapes (and features) and in the visual amenity landscapes ~~Rural Landscape~~ of the district.

(de) To avoid remedy and mitigate the adverse effects of urban subdivision and development where it does occur in the other outstanding natural landscapes of the district by:

- maintaining the open character of those outstanding natural landscapes which are open at the

date this plan becomes operative;

- ensuring that the subdivision and development does not sprawl along roads.

(ed) To avoid remedy and mitigate the adverse effects of urban subdivision and development in visual amenity landscapes by avoiding sprawling subdivision and development along roads.

Changes have also been made to this policy to reflect the Society's position that seeks a single Outstanding Natural Landscape landscape category that applies across the whole District.

Summary of Submission	Council reaffirm the Arrowtown Growth Boundary as it is currently constituted. Council suspend the introduction of terrace housing until agreement is reached with the Arrowtown community as to whether it is desirable, and if so what special design features would be needed to safeguard the town's character, heritage and appeal. Council needs to acknowledge that modest infill has been part of Arrowtown's past and moderate infill is part of its future. Council has to realise that Arrowtown needs to be sensitively guided into increased infill. If all the Council's proposed district plan changes are adopted are aggressively forced onto Arrowtown, the fabric of the town and its heritage is likely to be severely damaged. In this case the community is likely to become increasingly hostile to what they see as yet another example of QLDC heavy handedness towards the town.

Summary of Submission Insert the following text into the Purpose section of Chapter 4:

Queenstown Airport is a significant asset to the region. It provides a transportation hub for residents, visitors and business travellers and offers both domestic and international scheduled flights. The Airport also facilitates and supports a number of local tourist and aviation related businesses.

The Airport has been established at its current location in Queenstown since 1936. Since then the Airport has faced pressure from urban development. It is essential that such development is managed in a way that protects the current and future ability of the Airport to operate efficiently. It is also reasonable that noise boundaries are established for aircraft operations at the Airport in order to appropriately mitigate adverse effects on any Activity Sensitive to Aircraft Noise in the surrounding environment.

Being within the township of Frankton, Queenstown Airport has some existing residential neighbours. It is recognised that the anticipated growth in operations at Queenstown Airport will necessitate sound insulation and mechanical ventilation works to Critical Listening Environments within some existing, new or altered buildings in order to mitigate the effects of aircraft noise.

Queenstown Airport Corporation Limited will undertake regular monitoring to ensure that the owners or occupiers of existing buildings containing an Activity Sensitive to Aircraft Noise within the Projected 65 and 60 dB AANC are offered appropriate noise mitigation in accordance with Designation 2.

The noise boundaries are also necessary to ensure new noise sensitive development does not occur in inappropriate locations, and new and alterations and additions to existing buildings are designed to achieve the Indoor Design Sound Level.

Reverse sensitivity effects on Queenstown Airport may arise where Activity Sensitive to Aircraft Noise are established within the Airport's Air Noise Boundary or Outer Control Boundary.

Point Number 433.41 **Provision:** 11-4 Urban Development > 13-4.2 Objectives and Policies > 22-4.2.2 Objective 2.

Summary of Submission Amend Policy 4.2.2.4 as follows:

Policy 4.2.2.4

Not all land within the Urban Growth Boundaries will be suitable for urban development or intensification, such as (but not limited to) land with ecological, heritage or landscape significant; or land subject to natural hazards or within close proximity to airports. The form and allocation of urban development shall take account of site specific features or constraints to protect public health and safety.

Position: Other - Please clearly indicate your position in your submission below

Summary of Submission Retain the objective as notified, but amend the related policies as set out in the immediately subsequent submission points.

Point Number 433.44 **Provision:** 11-4 Urban Development > 13-4.2 Objectives and Policies > 37-4.2.4 Objective 4 > 40-4.2.4.3.

Position: Other - Please clearly indicate your position in your submission below

Summary of Submission Amend the policy as follows to create two separated policies:

Policy 4.2.4.3

Within existing residential zones, ~~P~~protect Queenstown Airport from reverse sensitivity effects, and maintain residential amenity through managing the effects of aircraft noise within critical listening environments of new or altered buildings within the Air Noise Boundary or Outer Control Boundary.

And:

Policy 4.2.4.3

Within Rural and Industrial Zones, ~~P~~protect Queenstown Airport from reverse sensitivity effects through preventing the establishment of new activities sensitive to aircraft noise within.

Point Number 433.45 **Provision:** 11-4 Urban Development > 13-4.2 Objectives and Policies > 37-4.2.4 Objective 4 > 41-4.2.4.4

Position: Other - Please clearly indicate your position in your submission below

Summary of Submission Retain the policy, however relocate it to sit alongside the new objectives and policies that are sought by QAC, as detailed below.

Insert the following new objectives and policies into the Proposed Plan:

Objective 4.2.X

Manage urban growth issues on land in proximity to Queenstown Airport to ensure that the operational capacity and integrity of the Airport is not significantly compromised now or in the future.

Policy 4.2.X.1

To protect the airport from reverse sensitivity effects of Activity-Sensitive to Aircraft Noise.

Policy 4.2.X.2

To prohibit all new Activity Sensitive to Aircraft Noise within the Rural, and Industrial Zones located within the Outer Control Boundary at Queenstown Airport and to limit such uses in the Frankton Flats (A) Zone.

Policy 4.2.X.3

To prohibit all Residential, Visitor Accommodation and Community Activities within that part of the Remarkables Park Zone within the 2037 60dB Noise Contour at Queenstown Airport.

Policy 4.2.X.4

To ensure that Critical Listening Environments of all new and alterations and additions to existing buildings containing Residential, Educational Facilities and Visitor Accommodation in the Remarkables Park Zone in the areas identified in Figure 2 – Airport Measures in the District Planning Maps achieve an Indoor Design Sound Level of 40 dB Ldn, based on the 2037 Noise Contours.

Policy 4.2.X.5

To ensure that any Critical Listening Environments of all new and alterations and additions to existing buildings containing an Activity Sensitive to Aircraft Noise located in the existing Residential zones, and the Frankton Flats (A) Zone within the Queenstown Airport Outer Control Boundary are designed and built to achieve an Indoor Design Sound Level of 40 dB Ldn, based on the 2037 Noise Contours.

Objective 4.2.X

Maintain and promote the efficient operation of Queenstown Airport and set appropriate noise limits in order to protect airport operations and to manage the adverse effects of aircraft noise on any Activity Sensitive to Aircraft Noise.

Policies 4.2.X.1

To ensure appropriate noise boundaries are established and maintained to enable operations at Queenstown Airport to continue and to expand over time.

Policy 4.2.X.2

To manage the adverse effects of noise from aircraft on any Activity Sensitive to Aircraft Noise within the airport noise boundaries whilst at the same time providing for the efficient operation of

Queenstown Airport.

Policy 4.2.X.2

To manage the adverse effects of noise from Queenstown Airport by conditions in Designation 2 including a requirement for a Noise Management Plan and a Queenstown Airport Liaison Committee.

Summary of Submission	Seeks that the Urban Growth Boundary (UGB) line be shifted to south to align with the ONL line in order to restrict further development of this area and protect the landscape value of Ferry Hill, as shown on the attached map to submission 501.		
Point Number	501.15	Provision:	11-4 Urban Development > 13-4.2 Objectives and Policies > 37-4.2.4 Objective 4
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	Opposes the proposed UGB line. States that the existing UGB, while enabling some urban expansion, does not go far enough for the future generations in the Wakatipu basin. Sustainable management will therefore not be achieved. Submits that an example of an area that can absorb future urban zoning is between Jacks Point and Frankton as shown on the plan attached to submission 501. Requests that if the UGB is to be retained in the District Plan, then it should be expanded to enable the expansion of urban zones in the future into areas that can absorb urban development.

Summary of Submission	General support with some amendments requested We generally support the Strategic Direction chapter of the Plan, with the following additions or exceptions, and comments: Wanaka 2020 consultation discussions gave firm recommendation that the Outer Growth Boundary (OGB) for Wanaka include the three rivers (Clutha, Cardrona and Waterfall Creek [with the fourth Waterway being Lake Wanaka]) as the limiting landscape features within which to contain growth (see Wanaka 2020 plan map in the original submission showing [originally red, but green in the attachment] overwhelming public acceptance and approval of the OGB). The proposed Urban Growth Boundary may be appropriate for a current ten year plan, but the originally recommended OGB needs to be retained; come time for the next review of the Plan, the UGB could, if needed, be expanded. Thus, we seek an additional clause in this section, making it clear that the proposed UGB is not a permanent fixture (referring to the Wanaka 2020 OGB as the longer term limit on urban sprawl).

Summary of Submission	Support with amendments. Add an following amendments and additional paragraph: Uncontrolled urban development can result in the fragmentation of rural land; and poses risks of urban sprawl, disconnected urban settlements and a poorly ineffective and inefficient coordinated infrastructure network. The roading network of the District is under some pressure and more low density residential development located remote from employment and service centres has the potential to exacerbate such problems. The objectives and policies for Urban Development provide a framework for a managed approach to urban development that utilises land and resources in an efficient manner, and preserves and enhances natural amenity values. The approach seeks to achieve integration between land use, <u>infrastructure such as</u> transportation, services, open space networks, community facilities and education; and increases the viability and vibrancy of urban areas <u>Well planned urban growth and land use will also ensure that adverse effects on the operation, maintenance, upgrading and long-term development of regionally significant infrastructure, such as the National Grid, are avoided.</u>

Summary of Submission Objective 4.2.1.7

Issue:

(a) It is difficult to see how urban development can maintain the productive potential and soil resource of rural land as required by Policy 4.2.1.7. If that is intended to be achieved by excluding urban development from rural land, then the policy should be amended to broaden the reference to what is being protected.

Relief Requested:

(b) Either delete Policy 4.2.1.7 or amend it as follows:

"Urban development maintains the ~~productive~~ potential and ~~soil~~ resources of rural land"

Summary of Submission Policy 4.2.3.7

Issue:

(a) Policy 4.2.3.7 requires the edges of Urban Growth Boundaries to be managed to provide a sensitive transition to rural areas. That assumes that a sensitive transition is always appropriate. The difficulty with that approach is that supposedly 'sensitive' transitions, such as rural residential zoning around the edge of an urban area, inevitably crumble under development pressure. In many cases a hard urban edge is a better and more defensible approach.

Relief Requested:

(b) Amend Policy 4.2.3.7 as follows:

"The edges of Urban Growth Boundaries are managed to provide a sensitive an appropriate transition to rural areas."

Summary of Submission	Combine the ' <u>Manawhenua</u> ' and the ' <u>Association with the Queenstown Lakes District</u> ' sub-sections under a new subheading ' <u>Ngai Tahu Association with the Queenstown Lakes</u>		

District'. This is recommended for clarity. Replace the notified text as set below:

Ngai Tahu Association with the Queenstown Lakes District'

Waitaha, Kati Mamoe and Ngai Tahu, nowadays collectively referred to as Ngai Tahu, are a network of peoples closely connected by whakapapa, trade and their shared history who constantly traversed Te Wai Pounamu. Ngai Tahu have centuries' long customary associations, rights and interests in the Queenstown Lakes District and its resources. These associations are both historical and contemporary and include whakapapa, place names, mahinga kai, tribal economic development and landholdings.

Traditionally Ngai Tahu Hapu would travel to pre-determined sites throughout the region to gather mahinga kai resources for their own use, as well as for trade. The hunting of birds, eels, the digging of fern root and ti root, and the gathering of taramea, and precious stone resources such as pounamu and silcrete, were the main focus of activity.

Ngai Tahu had permanent and seasonal kainga (villages and campsites) around the interior lakes Whakatipu Wai Maori, Wanaka

and Hawea. These kainga included:

a. Queenstown: A kaika was located near Queenstown called Tahuna, where a Kati Mamoe chief Tu Wiri Roa was born and grew to manhood. Tu Wiri Roa had a daughter Haki Te Kura, whom is immortalised by swimming across Lake Wakatipu a distance of some five kilometres or more. Another settlement, Te Kirikiri pa, once occupied the site where the Queenstown Gardens is now. Kati Mamoe had a kaika near the Kawarau Falls called O Te Roto, and another kaika, Takerehaka, was sited near Kingston.

-

b. Wanaka: A kaika called Parakarehu, was sited near present day Penrith. Takikarara kaika was situated on the peninsula between Roy and Dublin Bays. Settlements and campsites existed at Makarora and Matukituki.

c. Hawea: There were a number of sites at Hawea where small settlements and campsites were utilised seasonally. Manuhaea was an important eeling kaika at the neck of the lake. The old kaika of Manuhaea was flooded when the Hawea dam was constructed, as occurred with a number of other sites around the edge of Lake Hawea.

A number of Maori ara tawhito (trails) traversed the inland area of what is now the Queenstown Lakes District. The routes went inland from the coastal settlements of Otago and Southland up the valleys and passes, and returned following the waterways.

Manawhenua hold traditional customary rights and maintain contemporary relationships within the District determined by whakapapa (genealogical ties), resource use and ahi-ka-roa (the long burning fires of occupation). These rights are traceable and defined by tradition, whakapapa and

practice.

Ngai Tahu has maintained its associations with the District and continues to develop its economy through investment in tourism, landholdings and mahinga kai initiatives. Artworks, interpretation, stories and place names continue to reflect Ngai Tahu's contemporary identity in the built and natural environment. The Queenstown Lakes District Council acknowledges the special relationship Ngai Tahu has with the District through the Treaty partnership.

Summary of Submission	The Glentarn decision near Glenorchy (C10/2009 Glentarn Group Ltd. V. QLDC) holds that the provisions of the Operative District Plan can only be interpreted as being very supportive of farming. The provisions contained in the Operative District Plan be amended to tighten and clarify rules associated with farming activity on small lots such that "the primacy of landscape outcomes" are realised. The Society seeks, as one possible option, changes to the Operative District Plan as follows: The Operative District Plan policy 5.2.1.5 reads: <i>1.5 Provide for a range of buildings allied to rural productive activity and worker accommodation</i> The Society seeks this policy is amended in the Operative District Plan to read: <i>1.5 Provide for a range of buildings allied to and necessary for the exercise of rural productive activity and worker accommodation. Any residential building proposed on the grounds that it is allied to and necessary for rural productive activity shall be subject to the same landscape</i>

Summary of Submission	Expresses concern regarding the Discretionary activity status for subdivision and development within Outstanding Natural Landscapes and Outstanding Natural Features; and the change from a proposed non-complying activity status which was indicated in the March 2015 Draft District Plan. The society seeks that the s32 Landscape Evaluation Report be re-written containing discussion of the costs and benefits associated with the option of residential subdivision and development becoming non-complying versus discretionary. The s32 Landscape Evaluation Report should then be publicly notified with a 40 working day submission period.

Summary of Submission	There is a high emphasis on rural land in this chapter. It is also based almost entirely around preserving the natural or physical landscape. Landscape does not have boundaries. It continues right into the centre of our town centres and this needs to be recognised. Our urban environment – streets, parks, reserves, beaches and lake edges, built heritage and urban form are all an integral part of landscape. Landscape should be considered holistically Farming is a cultural construct, farmers are custodians of the land not museum curators.

Summary of Submission	Supports in part.		

Add sentence below first paragraph and amend as follows:

The District's landscapes are of significant value to the people who live in, work in or visit the District. The District relies in a large part for its social and economic wellbeing on the quality of the landscape, open and urban spaces and environmental image.

The District's natural landscapes are experienced by residents and visitors at the 6 major town centres (Queenstown, Wanaka, Arrowtown, Frankton, Kingston & Glenorchy).

The quality of these town centre urban landscapes, and how they relate to natural landscape is integral to the natural landscape experience.

The natural and physical landscapes consist of a variety of landforms created by uplift and glaciations, which include mountains, ice-sculpted rock, scree slopes, moraine, fans, a variety of confined and braided river systems, valley floors and lake basins. These distinct landforms remain easily legible and strong features of the present landscape.

Indigenous vegetation also contributes to the quality of the District's landscapes. Whilst much of the original vegetation has been modified, the colour and texture of indigenous vegetation within these landforms contribute to the distinctive identity of the District's landscapes.

The open character of ~~productive farmland~~ rural land is ~~a key~~ one key element of the landscape character which can be vulnerable to degradation from subdivision, development and non-farming activities. The prevalence of large ~~farms and~~ landholdings contributes to the open space and rural working character of the landscape. The predominance of open space over housing and related domestic elements is a strong determinant of the character of the District's rural landscapes. Some rural areas, particularly those closer to Queenstown and Wanaka town centres and within parts of the Wakatipu Basin, have an established pattern of housing on smaller landholdings. The landscape character of these areas has been modified by vehicle accesses, earthworks and vegetation planting for amenity, screening and shelter, which have reduced the open character exhibited by larger scale ~~farming activities~~. landholdings While acknowledging these rural areas have established housing, a substantial amount of subdivision and development has been approved in these areas and the landscape values of these areas are vulnerable to degradation from further subdivision and development. It is realised that rural lifestyle development has a finite capacity if the District's distinctive rural and open landscape values are to be sustained. ...etc

Summary of Submission	If Lot 1 remains split zoned as demarcated on Planning Map 29 of the PDP, submitter opposes in part objective 6.3.1 which states that the District contains and values Outstanding Natural Features, Outstanding Natural Landscapes, and Rural Landscapes that require protection from inappropriate subdivision and development. This objective should provide the flexibility of avoiding, remedying or mitigating adverse effects in all landscapes.		

Point Number	248.14	Provision:	81-6 Landscape > 84-6.3 Objectives and Policies > 98-6.3.2 Objective 2
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	If Lot 1 remains split zoned as demarcated on Planning Map 29 of the PDP, submitter opposes in part Objective 6.3.2 and the policies that give effect to this objective, when dealing with cumulative effects.		

Point Number	248.15	Provision:	81-6 Landscape > 84-6.3 Objectives and Policies > 112-6.3.5 Objective 5 > 114-6.3.5.2
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	If Lot 1 remains split zoned as demarcated on Planning Map 29 of the PDP, submitter opposes in part Policy 6.3.5.2 which seeks to avoid adverse effects from subdivision and development. This policy should be amended so there is flexibility of avoiding, remedying or mitigating adverse effects in the specified Rural Landscapes.		

Point Number	248.16	Provision:	81-6 Landscape > 84-6.3 Objectives and Policies > 112-6.3.5 Objective 5 > 116-6.3.5.4
Position:	Other - Please clearly indicate your position in your submission below		

Summary of Submission	If Lot 1 remains split zoned as demarcated on Planning Map 29 of the PDP, submitter opposes in part Policy 6.3.5.4 which seeks to avoid planting and screening, particularly along roads and boundaries, which in turn could degrade openness where such openness is an important part of the landscape quality or character. Planting and screening is often an effective mitigation method that avoids adverse effects of subdivision and development within the rural zone.		
Point Number	248.17	Provision:	81-6 Landscape > 84-6.3 Objectives and Policies > 112-6.3.5 Objective 5 > 118-6.3.5.6
Position:	Other - Please clearly indicate your position in your submission below		
Summary of Submission	If Lot 1 remains split zoned as demarcated on Planning Map 29 of the PDP, submitter opposes in part Policy 6.3.5.6 which states that regard should be had to the adverse effects from subdivision and development on the open landscape character where it is open at present. This policy in effect is seeking to maintain open space in the rural zone, irrespective of the landscape classification.

Summary of Submission	Requests the ONL lines be reviewed. Submitter objects to the ONL lines which have been drawn on the new district plan maps. Submitter notes that in the Morven Ferry Neighbourhood (shown on proposed planning map 30) it has been drawn in where there was no line before, running through paddocks that have been ploughed and heavily modified. On the submitters neighbouring property Doonholm the ONL line has been shown on the developed paddocks well out from the base of Morven Hill, and considers that this line should be moved back to the paper road at the base of Morven Hill. Requests that the ONL line should actually run up and over the top of Morven Hill leaving the back side away from Lake Hayes open for recreational development such as down hill mountain biking.

Summary of Submission	That ONL lines be deleted from the Proposed District Plan and replaced when consultation form the community has taken place. ONL should not include any flat land in the Wakatipu Basin that has been modified by pastoral farming. The ONL line should be deleted around the top of the Rural Residential on Morven Hill (shown on Proposed Planning Map 30) and placed at a level that is slightly higher than the saddle at the Western end of Morven Hill. This would then protect the view from Lake Hayes of the Western side of Morven Hill. The line on the Eastern side of Morven Hill now is also through ploughed paddocks and puts more than one residential house in ONL. The line should be deleted. The ONL around Punt Hill, (the Hill on the western side of Morven Ferry Road adjacent to the Kawarau River) should be deleted and placed on the front side of the hill above the track at power transmission line height.

Summary of Submission	<i>The following changes are sought:</i>		

6.2 Values

[...]

While acknowledging these rural areas have established housing, a substantial amount of subdivision and development has been approved in these areas and the landscape values of these areas are vulnerable to degradation from further subdivision and development. It is realised that rural ~~lifestyle~~ living development has a finite capacity if the District's distinctive rural landscape values are to be sustained.

However, rural living can be enabled in certain locations if landscape character and visual amenity values are not unduly compromised.

Summary of Submission	Within the Rural zone farmers should be able to carry out reasonable levels of earthworks as a permitted activity. The Rural provisions that affect farms should not be complex and require input in from Landscape planners who add unnecessary cost into a business. The more complex you make the rules in the more the farming community will want detail landscape Zone done, The detail Zone boundaries and maps required between ONL and RLC as many farmers would argue that only parts of their farms may fall into ONL not blanket areas this may cause the plan to get bogged down.

Summary of Submission	The 2007 Landscape Protection designation was not requested by the public, and the land over which it was placed has no unifying landscape character. It seems to have been the result of ingenuous and/or ingenious bureaucratic invention similar to the <i>uber</i> decision-making that apparently saw the Blennerhassett (and part of the Mills) land as 'undeveloped and available' ! Would such a manoeuvre have been tried with land owned by one of the 'locally prominent' developers ? ... we doubt it !

Summary of Submission	The designation of Outstanding Natural Feature for the Clutha River be limited to the river and, in the case of specific areas adjacent to the river that are significant enough to need such a designation (such as Halliday Bluff), the river plus its crown reserve. The crown reserve offers protection of between 80 and 100 metres either side of the Clutha river from the Cardrona-Clutha confluence to Luggate. The designation ONF is inappropriate as a way of describing a wider tract of land adjoining the river and/or visible from the river. The term should be limited as far as possible to the feature itself, that is the river, and the designation ONF should be sufficient to protect those areas immediately adjacent to and visible from the ONF without the need to incorporate more land within the classification ONF.

Summary of Submission	Support with amendments. Amend to: Landscapes have been categorised into three classifications within the Rural Zone. These are Outstanding Natural Landscapes (ONL) and Outstanding Natural Features (ONF), where their use, development and protection are a matter of national importance under Section 6 of the RMA. <u>These landscape values need to be carefully managed and protected from inappropriate subdivision, use and development. They must also be balanced with other matters of national importance, such as the operation, maintenance, upgrading and development of the National Grid.</u> The Rural Landscapes Classification (RLC) makes up the remaining Rural Zoned land and has varying types of landscape character and amenity values. Specific policy and assessment matters are provided to manage the potential effects of subdivision and development in these locations.

Summary of Submission	Policy 6.3.5.5 Issue: (a) Policy 6.3.5.5 seems to assume that visibility of development is automatically adverse, whereas the surrounding rural character of a particular proposed development may be such that visibility is either not an issue, or is not such an issue that the development must necessarily be located where it is least visible. There is no automatic need to force development to locate in the biggest hole in the ground on the relevant site. Relief Requested: (b) Amend Policy 6.3.5.5 as follows: "Encourage development to utilise shared accesses and infrastructure, <u>and</u> to locate development within the parts of the site where they it will be least visible, and have the least <u>mitigate</u> disruption to the natural landform and rural character."

Summary of Submission	Rule 6.4.1.3 Landscape Category - Ski Area Sub Zones Issue: (a) The Operative District Plan excludes Ski Area Sub Zones from the landscape categories. Rule 6.4.1.3 carries that exemption forward but amends it to read "Ski Area Activities within the Ski Area Sub Zones". This amendment effectively means that the landscape categories apply to some activities within Ski Area Sub Zones but not to other activities within Ski Area Sub Zones. That is a nonsense. (b) All of the other exclusions in Rule 6.4.1.3 apply to identified areas of land, not to activities. That is logical and understandable, because a landscape category applies to land, not to activities. The same should apply within the Ski Area Sub Zones. Relief Requested: (c) Amend Rule 6.4.1.3.a as follows:		

~~"Ski Area Activities within the~~ The Ski Area Sub Zones".

Point Number	836.22	Provision:	81-6 Landscape > 131-6.4 Rules > 132-6.4.1 Application of the landscape provisions > 136-6.4.1.4
Position:	Not Stated		
Summary of Submission	Policy 6.4.1.4 Issue: (a) Policy 6.4.1.4 is unnecessary and inappropriate and legally incorrect. Lakes and rivers are features. The landscape categories apply to landscapes. There is no issue with lakes and rivers within identified ONLs comprising part of that ONL, but it is a separate exercise to classify an individual lake or river as an ONL (rather than an ON F), and any such approach is not supported by the Council's s32 Analysis. Relief Requested: (b) Either delete Policy 6.4.1.4 or amend its wording to make it clear that what is meant is that any lake or river within an identified ONL is part of that ONL.
